### WPDES Permitted Farm

Manure Credits: 2nd Year

Strategy(ies) for applying manure adjacent to navigable water, conduits to navigable water or wetlands:

1. No applications within 25 ft; inject or immediately incorporate in rest of SWQMA
2. No applications within 25 ft; Long-term, no-till; surface apply in the rest of SWQMA

### Manure will be applied to the following fields with SWQMA, W, or R soil restrictions:

#### For fields with W soil restrictions:

CAFO field areas that may have groundwater within 2 feet of surface at time of manure application will be verified prior to application for  
 (1) groundwater depth or  
 (2) presence of functioning drain tiles within all wet field areas to ensure groundwater depth is below 2 feet of surface.  
 These fields will have specific records of these investigations, including methods used, which will be maintained within the NMP.

Field Name / Crop Year	In SWQMA	Has W Soils	W Soil Acknowledged	Has R Soils	R Soil Acknowledged
