Subject: Review On Hold Plans & Specifications for a Hog Facility at Cumberland LLC in Burnett County

Dear Jeff Sauer:

This letter is to inform you that the Wisconsin Department of Natural Resources (DNR) has reviewed the proposed plans and specifications and determined them to be incomplete. The reason for incompleteness is the requirement that a new complete permit issuance application is required to be submitted before review of the plans continues. The review is currently on hold and the completeness date will be the date a complete permit application is received. A new plans and specifications submittal is **not** required at this time. The proposal was submitted under certification by Erik Lietz, Oakridge Engineering on October 28, 2022 on behalf of Cumberland LLC. The proposed plans and specifications (DNR project # R-2022-0240) were reviewed in accordance with s. 281.41, Wis. Stats., and ch. NR 243, Wis. Adm. Code.

The proposed project is **not** approved, and construction may not commence until the plans and specifications are approved by the DNR. If the proposed facilities in this plan submittal are required to meet requirements within the WPDES Schedules Section or due date listed in an enforcement notice, contact your DNR CAFO Specialist. If the plans and specifications are needed for a permit application, please contact your DNR CAFO Specialist for a deadline to meet requirements. Questions may be directed to the review engineer Ian Hansen, DNR Madison Office (contact information is at the end of this letter).
